

ALTA HIGH SCHOOL ART DEPARTMENT PREREQUISITE FLOW CHART

Two Dimensional Track

Three Dimensional Track

★ NOTE: These courses may be taken for concurrent enrollment credit.

Note to Parents and Students

It is highly recommended that the above flow chart be followed when registering for classes. However, we do understand that a course may be taken at a different grade level than what is listed above, it is important that the prerequisites are taken BEFORE the more advanced courses at whichever grade the student begins on a track. For example, if an 11th grade student begins the Two Dimensional Track, they should begin with Drawing 1. Our instructors will teach advanced courses under the assumption that students have learned the fundamentals in the foundation courses and are ready for more challenging assignments.

- For the success of the student, it is recommended that students interested in the Two Dimensional Track begin by taking Drawing 1. Good solid drawing skills are fundamental to becoming a skilled artist.
- For the success of the student, it is recommended that students interested in the Three Dimensional Track begin by taking Ceramics 1, regardless of what has been taken in middle school.

If you feel your student is exceptionally skilled, you or the student may contact one of the art instructors to schedule a portfolio review to help with class placement.

Photography students who have taken both Digital Photography & Advanced Commercial Photo 2 sign up for AP Studio Art: 2-D Design in Photography.
